JOB OBJECTIVE

Leverage over 9 years of international consulting experience in senior roles across Business Transformation, Data & AI Strategy, Digital Transformation, Product Management, Enterprise Analytics & Programme Delivery, enabling organisations to accelerate strategic initiatives, strengthen governance, optimise business performance and drive sustainable digital growth.

PROFILE SUMMARY

- ➔ Business transformation & enterprise consulting professional with experience delivering large-scale digital, PLM/ERP & analytics transformation programmes across Aviation, Manufacturing, Luxury Retail, Healthcare & Financial Services for global organisations.
- ➔ Proven track record of leading cross-functional transformation programmes by aligning business priorities, engaging senior stakeholders, establishing governance frameworks & delivering measurable business outcomes across global environments.
- ➔ Expertise in enterprise data strategy, business intelligence, product ownership, executive reporting and AI-enabled decision support to improve operational efficiency, data quality and strategic decision-making.

ACHIEVEMENTS

- ➔ Improved user adoption of enterprise reporting solutions by 50% through stakeholder engagement and change enablement.
- ➔ Increased dashboard utilisation by 60% by improving report usability & performance.
- ➔ Reduced critical production issues by 40% through proactive quality assurance.
- ➔ Reduced project delivery risks by 30% through proactive planning, dependency management and governance.

WORK EXPERIENCE & INTERSHIP

PLM & Data Transformation Consultant
We.PLM | (Dassault Systèmes Partner) , Paris, France
Mar 2026 – Present

Programme: Atlas Copco — ERP & PLM Data Transformation across 15+ European Product Companies | 3DEXPERIENCE / ENOVIA PLM

- ➔ Led enterprise analytics and Business Intelligence initiatives supporting a multi-million-euro digital transformation programme across **15+ European business entities**, delivering executive reporting solutions.
- ➔ Partnered with senior programme leadership to define analytics strategy, reporting governance, KPI frameworks, and data integration approaches that improved executive decision-making throughout complex transformation initiatives.
- ➔ Established enterprise data governance, quality, and reporting standards, defining business rules, validation frameworks, dashboard design principles, and acceptance criteria that became the benchmark for large-scale **PLM-to-ERP migration activities**.
- ➔ Collaborated with **Product, Engineering, Finance, Operations, PLM, and Data Engineering teams** to translate requirements into scalable analytics solutions, ensuring successful deployment and organizational adoption.
- ➔ Introduced AI-assisted executive reporting, integrating **Large Language Models (LLMs)** into reporting workflows to automate narrative generation, improve reporting productivity, and accelerate leadership decision support.
- ➔ Identified opportunities to modernise reporting and analytics capabilities by standardizing KPI frameworks, improving reporting processes, and promoting scalable Business Intelligence practices across the transformation programme.

Lead Data & Analytics Consultant
Iris Software, India | Remote
Nov 2025 – Feb 2026

Client: Advarra — Clinical Research Compliance & Technology Platform

- ➔ Migrated Advarra's clinical analytics off legacy **Oracle SQL Server** infrastructure onto a cloud-native **Databricks, Snowflake, and dbt ecosystem**, cutting weekly reporting overhead by roughly **40 hours**.

PUBLICATION

Hourly Investigations of the 2019 Heatwave in France (2020)

Research study analyzing meteorological data patterns and their socioeconomic impacts.

TECHNICAL SKILLS

- ➔ **Business Intelligence & Visualisation:** Power BI (Advanced DAX, Row-Level Security, Paginated Reports), Sigma BI, Tableau
- ➔ **Data Platforms & Engineering:** Databricks, Snowflake, Azure Data Factory, DBT, SQL Server, Oracle SQL, ETL
- ➔ **PLM & Enterprise Systems:** ENOVIA, 3DEXPERIENCE (Dassault Systèmes), SAP, EBOM/MBOM Data Models
- ➔ **Artificial Intelligence:** GPT-4, Claude, Prompt Engineering, AI-assisted Reporting & Dashboard Automation
- ➔ **Cloud Technologies:** Microsoft Azure, Microsoft Fabric, AWS, Azure DevOps, Power Platform
- ➔ **Programming & Query Languages:** Python, SQL (T-SQL, Oracle SQL), R
- ➔ **Project & Collaboration Tools:** JIRA, Confluence, GitHub, Microsoft 365
- ➔ **Programme & Product Delivery:** Product Ownership, Agile (Scrum), Roadmap Planning, Portfolio Governance, Business Analysis, UAT, Go-Live Management, Change Management, Risk Management

LANGUAGES

- ➔ **English:** Native / Fluent
- ➔ **French:** Upper Intermediate (DELF B1 Certified)
- ➔ **Hindi:** Native

- ➔ Designed and delivered 3 governed self-service analytics solutions on **Sigma BI**, translating complex clinical compliance and regulatory requirements into intuitive reporting that strengthened business visibility and decision-making.
- ➔ Directed Agile delivery for an **8-person cross-functional team**, managing sprint planning, delivery priorities, stakeholder communication, and risk management to deliver 4 enterprise reporting initiatives on time and in scope.

Product Owner & Senior BI Analytics Consultant

Cognizant Technologies, Paris, France

Jan 2020 – Sept 2025

Progressed from BI Consultant to Senior Consultant & Product Owner (2022–2025)

Multiple enterprise clients

- ➔ Led the end-to-end delivery of Business Intelligence and analytics products across multiple enterprise engagements, defining product roadmaps, business requirements, governance standards, and adoption strategies.
- ➔ Partnered with Finance and Sales leadership across 5+ regions to translate strategic objectives into forecasting and business-planning models supporting budgeting, territory planning, and commercial performance.
- ➔ Established enterprise analytics governance frameworks, standardizing KPI definitions, dashboard design principles, data quality controls, and reporting standards to improve consistency across multi-country deployments.
- ➔ Provided consulting and advisory support on Business Intelligence strategy, reporting modernization, cloud analytics, and AI-enabled decision support, acting as a trusted partner across cross-functional transformation initiatives.

Client managed:

- ➔ **Air France:** Developed a commercial intelligence platform covering **OTP, Revenue, Delay Root Cause and CSAT KPIs**, reducing decision cycles from **10–15 days**
- ➔ **Dior (LVMH):** Delivered a governed brand-intelligence platform enabling real-time counterfeit monitoring across **30+ global markets**, directly informing IP enforcement and executive marketing-strategy decisions.
- ➔ **AXA Insurance:** Delivered an integrated cybersecurity and budget-intelligence platform, replacing a **3-day manual consolidation process**
- ➔ **Sanofi:** Governed commercial data quality, sales forecasting across 5+ regions, restoring real-time revenue visibility for 200+ global sales.
- ➔ **Altarex:** Modernised the BI platform, resolving a critical performance bottleneck to deliver **sub-second query response** for **50+ concurrent users** across European business units.

Data Analyst Intern

Liebherr Aerospace and Transportation, Toulouse, France

Jul 2019 – Jan 2020

- ➔ Applied Value Stream Mapping (VSM) to identify operational bottlenecks and critical KPIs, defining improvement roadmaps adopted by operations leadership.
- ➔ Built data-driven AS-IS and TO-BE process models, translating operational analysis into actionable recommendations for senior management

Business Analyst/Scrum Coordinator

Capgemini, Bangalore, India

Aug 2015 – Aug 2018

Client: Société Générale (Paris)

- ➔ Directed the transition from Waterfall to Scrum for a 15-person delivery team, establishing the initial product backlog and driving sprint ceremony adoption.
- ➔ Partnered with business stakeholders and global delivery teams to prioritise requirements and coordinate sprint activities, aligning delivery priorities with business objectives and milestones.
- ➔ Produced weekly and monthly security operations reporting for Société Générale stakeholders, maintaining consistency across a multi-country financial services engagement.
- ➔ Managed daily prioritisation and communication with global client teams across 3 regions, strengthening backlog visibility and reducing reporting turnaround.
