

ANKIT PARIHAR

Senior BI & Data Transformation Consultant

Doha, Qatar · parihara90@gmail.com · +33 768604732 · [Linkedin](#) · [Portfolio](#)
Open to Relocation

PROFESSIONAL SUMMARY

Senior BI leader specialising in data transformation, commercial analytics, and PLM/ERP programme delivery. 9 years driving measurable outcomes across Aviation, Pharma, Luxury, and Insurance — with named results at Air France, Dior (LVMH), AXA, and Sanofi. Deep expertise in Power BI, Databricks, and ENOVIA, with C-suite advisory experience. Currently leading PLM data transformation for a €multi-million Atlas Copco programme on the 3DEXPERIENCE platform.

SKILLS

BI & Analytics	Power BI (Advanced DAX, RLS, Paginated Reports), Sigma BI, Tableau, Dashboard Design, Self-Service Analytics, Reporting Automation, Data Modelling
Data Engineering	Databricks, Azure Data Factory, Snowflake, DBT, SQL Server, Oracle SQL, ETL, Data Governance
PLM & ERP	ENOVIA, 3DEXPERIENCE (Dassault Systèmes), EBOM/MBOM Workflows, SAP (BPCS-to-SAP migration), Change Management Processes
Programme Delivery	Product Owner, Roadmap Planning, Portfolio Governance, UAT, Go-live Management, Stakeholder Management, Risk Reporting
AI & Automation	LLM-assisted report summarisation and insight generation (Claude, GPT-4); AI-augmented data quality checks integrated into Power BI pipelines; prompt engineering for automated commentary on executive dashboards
Cloud & DevOps	Azure (Data Factory, DevOps), AWS, Microsoft Fabric, GDPR Awareness, Power Platform
Languages & Tools	Python, SQL (T-SQL / Oracle), R, JIRA, Confluence, GitHub, Microsoft 365
Data Strategy & Governance	Enterprise Data Strategy, Data Governance Frameworks, Data Maturity Assessments, Data Ownership Models, Data Lifecycle Management, Master Data Management (MDM), DAMA-DMBOK Practices

PROFESSIONAL EXPERIENCE

PLM & Data Transformation Consultant | **We.PLM** | (*Dassault Systèmes Partner*) Paris, France Mar 2026 – Present
Programme: *Atlas Copco — ERP & PLM Data Transformation across 15+ European Product Companies | 3DEXPERIENCE / ENOVIA PLM*

- Led BI and analytics platform strategy for a €multi-million industrial transformation programme — delivering 3 executive reporting environments and enabling 15+ business entities to replace manual reporting with real-time operational intelligence.
- Provided advisory support to senior programme leadership on BI strategy, data integration architecture, and AI-assisted reporting — serving as analytics lead across all cross-functional workstreams.
- Delivered executive dashboards covering cost, schedule, migration progress, and operational readiness — replacing a 10–15 day reporting cycle with real-time self-service intelligence (est. €50k+/year saved).
- Executed enterprise data quality remediation across 80%+ of PLM records, establishing acceptance criteria adopted as the programme quality standard for BPCS-to-SAP cut-over across all 15+ product companies.
- Defined enterprise analytics governance standards across all reporting environments — KPI definitions, dashboard design criteria, data quality frameworks, and forecasting validation rules.
- Coordinated analytics workstreams across PLM, data engineering, finance, and operations — translating ENOVIA data structures into technical requirements and owning go-live readiness sign-off.
- Piloted LLM-assisted commentary generation (GPT-4) within executive dashboard workflows — reducing manual narrative preparation by ~3 hours per reporting cycle and accelerating programme leadership briefings.

Lead Data & Analytics Consultant | **Iris Software** | India | Remote Nov 2025 – Feb 2026
Client: *Advarra — Clinical Research Compliance & Technology Platform*

- Led enterprise data platform strategy and end-to-end migration from Oracle SQL Server to Databricks and Snowflake — building a fully cloud-native analytics architecture that eliminated legacy infrastructure dependency and reduced reporting overhead by ~40 hours/week
- Delivered 3 production-grade self-service reporting suites on Sigma BI, governed on Snowflake/dbt — translating complex clinical compliance requirements into governed analytics for a regulated enterprise environment.
- Defined data governance standards, data quality frameworks, and KPI measurement models for the analytics platform — establishing data ownership and integration roadmaps aligned with enterprise compliance objectives.
- Drove full programme governance across a cross-functional team of 8 — sprint planning, stakeholder steering, risk reporting — completing 4 production-grade reporting workstreams on time and within scope.

- Led full product lifecycle for BI and analytics platforms across 5 enterprise clients, defining enterprise data strategies, setting platform standards, overseeing delivery, and driving C-suite adoption through executive advisory.
- Designed enterprise analytics governance frameworks across all engagements: data quality acceptance criteria, KPI definitions, data ownership models, master data standards, and reporting consistency across multi-country deployments.
- Built forecasting and business planning models for Finance, Planning, and Sales teams across 5+ regions — supporting budgeting cycles, territory planning, and commercial performance management.
- Identified, assessed, and prioritised AI/ML and intelligent automation use cases for multiple enterprise clients, including predictive analytics for revenue forecasting, automated data quality monitoring, and AI-assisted insight generation translating business objectives into prioritised AI roadmaps.
- Provided advisory support to senior stakeholders on data platform strategy, digital integration, and AI-assisted analytics, acting as the trusted data authority across cross-functional transformation initiatives.
- Mentored junior BI analysts across project teams, supporting onboarding and delivery standards.

Selected client outcomes:

- **Air France:** Built and led the commercial intelligence product for all Air France business units — OTP, revenue, delay root-cause, and CSAT KPI framework adopted airline-wide, cutting decision cycles from 10–15 days to same-day (est. €70k+/year saved).
- **Dior (LVMH):** Designed and delivered a governed brand intelligence platform with role-based access controls enabling real-time counterfeit monitoring across 30+ global markets — directly informing IP enforcement and executive marketing strategy decisions.
- **AXA Insurance:** Delivered a cybersecurity and budget intelligence platform for AXA — eliminated a 3-day manual consolidation cycle and enabled same-day threat response decisions (est. €30k+/year saved).
- **Sanofi:** Governed commercial data quality and sales forecasting across 5+ regions — restored real-time revenue visibility for 200+ global sales leaders, supporting territorial planning and performance management.
- **Altares:** Led BI platform modernisation — resolved a critical reporting bottleneck by delivering sub-second query performance for 50+ concurrent users, unblocking multi-team reporting operations entirely across European business units.

Data Analyst Intern | **Liebherr Aerospace and Transportation** | Toulouse, France

Jul 2019 – Jan 2020

- Applied Value Stream Mapping to identify critical KPIs, map processes and define improvement roadmaps adopted by operations leadership.
- Produced data-driven AS-IS/TO-BE process models, translating analytical findings into actionable recommendations for senior management.

Business Analyst/Scrum Coordinator | **Capgemini** | Bangalore, India

Aug 2015 – Aug 2018

Client: Société Générale (Paris)

- Produced weekly and monthly security operations summaries for Société Générale stakeholders, maintaining reporting consistency across a multi-country financial services engagement.
- Facilitated the shift from Waterfall to Agile for a 15-person delivery team at Société Générale — defining the initial product backlog and supporting sprint ceremony adoption.
- Managed daily prioritisation and communication with global client teams to maintain backlog alignment across a financial services delivery programme.
- Contributed to security operations reporting across 3 global regions for Société Générale — supporting structured sprint delivery that reduced reporting turnaround time and strengthened cross-team backlog visibility.
